Introduction, ... ix-xxiv

TABULAR PRESENTATIONS.

Population and Sex: by Towns, ... 1-14
County and State Recapitulation, ... 8
Villages in Massachusetts, ... 9-14

Population for 1870 and 1880: Increase and Decrease: by Towns, . . . 15-26
Towns showing Increase, ... 17-19
Towns showing Decrease, ... 20, 21
County and State Recapitulations, ... 22, 23

Families and Dwellings: by Towns, ... 27-36
County and State Recapitulation, ... 34, 35

Place of Birth: Native and Foreign Born: Color and Race: by Towns, . 37-90
County and State Recapitulation 88, 89

Parent Nativity: by Towns, ... 91-100
County and State Recapitulation, ... 101

Foreign Parent Nativity: by Towns, ... 101-212
County Recapitulations, ... 206-210
State Recapitulation, ... 210

Ages: by Towns, ... 213-256
County and State Recapitulation: by years, ... 250, 251
State Recapitulation: by years, with Sex, Native White, Foreign White, Colored and Aggregates, ... 252, 253

Classified Occupations: by Towns, ... 257-280
County and State Recapitulation, ... 279

Occupations, Manufacturing and Mechanical: by Industries, . . . 281-338
Agricultural Implements, ... 283
Arms and Ammunition, ... 283, 284
Artisans' Tools, ... 284, 285
Bakeries, ... 285, 286
Bookbinderies, ... 287

33375

OCCUPATIONS, ETC. — Concluded. Page

Boots and Shoes, ... 287–290
Boxes, ... 290, 291
Brooms and Brushes, ... 291, 292
Building, ... 292–294
Carriages and Wagons, ... 295–297
Carpetings, ... 297
Clocks and Watches, ... 298
Clothing, ... 299–301
Cooking, Lighting, and Heating Apparatus, ... 301
Cotton Goods, ... 302, 303
Cotton and Woollen Goods, ... 303, 304
Flax, Hemp, and Jute Goods, ... 304
Food Preparations, ... 305, 306
Furniture, ... 307, 308
Glass, ... 308, 309
Hair, ... 309
Leather, ... 309–311
Linen, ... 311
Liquors and Beverages, ... 311, 312
Lumber, ... 312–314
Machines and Machinery, ... 314–316
Metals and Metallic Goods, ... 316–319
Musical Instruments, ... 319–320
Oils and Illuminating Fluids, ... 320
Paper, ... 320, 321
Printing, ... 322, 323
Print Works, ... 323, 324
Publishing, ... 324, 325
Railroad Construction, ... 325
Rubber, ... 326
Scientific Instruments and Appliances, ... 326
Silk, ... 327
Stone, ... 327, 328
Tobacco, ... 329
Vessels, ... 330
Wooden Goods, ... 331, 332
Woollen Goods, ... 332–334
Miscellaneous Manufactures, ... 334–336
State Recapitulation of Aggregates, ... 337

PRINCIPAL OCCUPATIONS WITH SEX AND NATIVITIES: BY TOWNS, ... 339–374
PRINCIPAL OCCUPATIONS, WITH SEX AND AGES: BY TOWNS, ... 375–394
PERSONS ENGAGED IN AGRICULTURE, WITH SEX AND NATIVITIES: BY TOWNS, . 395–410
County and State Recapitulation, ... 408, 409

PERSONS ENGAGED IN AGRICULTURE, WITH SEX AND AGES: BY TOWNS, . . 411–418
County and State Recapitulation, ... 418

CENSUS OF MASSACHUSETTS.

1880.

INTRODUCTION.

This supplement to the thirteenth annual report of the bureau of statistics of labor consists of an abstract of the leading features of the social and industrial statistics of this Commonwealth, as shown by the tenth United States Census; and, in accordance with the instructions of the legislature, by Resolve, chapter twenty-six, Resolves of 1882, such statistics are given for the several cities and towns of the Commonwealth.

With the exception of a table of total population, the tables published by the United States Census Office exhibit, as a rule, only state and county totals. The States, therefore, do not have the general statistics of their municipalities, under federal censuses. It would be almost an impossibility for the federal census to report even the most important features of the decennial enumerations for cities and towns; yet, to New England at least, such presentation is of the greatest value. By the provisions of the Resolve referred to, Massachusetts has secured the results of the last federal enumeration for the benefit of her cities and towns.

The tabulations for this work have occupied the Bureau for a full year and have called for the most arduous labors. These tabulations have been made in this office, either from original tally sheets, obtained at Washington, or from copies of original schedules, so that the work herewith presented is almost entirely original work by the office.

General Francis A. Walker, Superintendent of the Tenth Census, and his successor, Colonel C. W. Seaton, have at all times extended every facility to enable us to prosecute this work, and their uniform

courtesy, as well as that of the various chiefs of division of the Census Office, deserves the warmest thanks. They have each and all taken great interest in the work, and assisted us in every way possible to secure its early completion.

The prosecution of this statistical work has made me familiar with the character of the Tenth Census of the United States, and I do not hesitate to say that when its results are fully before the people, its real educational value will be realized, and it will be found that although it may have cost the country a great sum, the same amount of money could not have been spent more effectively in bringing all parts of the country to a knowledge of its true condition. I confidently look for an increased interest in all educational forces as the legitimate outgrowth of the Tenth Census. And when the time consumed in other countries in presenting simply the population tables of a census is taken into consideration, we shall feel that the publication of the many volumes of the Tenth Census has been accomplished in an unprecedentedly short time.

After the first tallies from schedules, but a limited force can be employed upon a census, and as the work advances the limit grows narrower, and the importance of the work broader, until, finally, one mind alone must complete the work. This necessity is not generally understood, and often subjects the statistician to unjust, though not necessarily unkind, criticism.

This Abstract shows the most important facts for our State concerning the people, agriculture, the fisheries, and manufactures. We have not incorporated in this volume the census statistics relating to mortality, crime, pauperism, insanity, wealth, indebtedness, taxation, railroads, etc., because our own State Government gathers and reports such statistics annually.

Every part of the work has been compressed to the last degree compatible with town showings. Notes of explanation will be found wherever essential to the proper understanding of the tables, yet a brief analysis of some of their more salient features may be of value to the public and supply data which is usually to be found in works of this kind.

The endeavor has been, so far as possible, to arrange the tables to correspond with the tables in the volumes of the State Census of 1875; for purposes of comparison, the value of this is readily seen. In some cases, more especially in regard to the industries of the State, such arrangement, owing to the differences in classification

under the federal and under the state systems, has been quite impossible.

The accuracy of all the statistics relating to the population cannot be doubted; and as to the industries, they are far more perfect than those of any previous federal census. The industrial statistics of our censuses, state and federal, are the features which place American enumerations far ahead of all others in the world, and while not so perfect as one might desire, they never deceive by over-statement; the real truth is always greater than the statistics indicate. For this reason they cannot be vicious.

All the tables should be used in connection with the notes accompanying them.

Under POPULATION, p. 1 to p. 26, are shown the population of the State, by sex division, for each town, ward, and city: the total population of a large number of the villages of the State as distinct from the towns in which they are situated; the population in 1870 and 1880 for towns and cities showing increase or decrease; and notes giving changes in town names, areas, etc., between 1870 and 1880.

By these exhibits it is found that the population consists of 858,440 males and 924,645 females, an excess of females of 66,205 in 1880 as against 49,793 in 1870; but while there has been a gain in actual numbers in this excess, the proportion has not changed much, for in 1870 the females made up 51.7 per cent of the total population, and in 1880 they were 51.8 per cent of the whole; in 1865 this percentage was 52.48, and in 1840 it was 50.52.

The total population in 1880 was 1,783,085 as against 1,457,351 in 1870, a gain of 325,734, or 22+ per cent. The gain in the decade from 1860 to 1870 was 226,285, or 18+ per cent, thus showing that the progress of population, during the past decade, has been superior to that for the decade preceding by 4 per cent. Massachusetts shows a larger percentage of gain than any other of the New England States, excepting Rhode Island. Her population constitutes 44+ per cent of the population of New England.

The territory within a radius of twelve miles from the State House contains 654,034 people, or 36.6 per cent of the total population of the State and one-sixth of that of New England. The cities of Massachusetts (including Brockton and Malden) have a population of 943,639, or 53— per cent of the whole population of the State; 202 towns and cities show a gain and 143 a loss since 1870.

Barnstable and Nantucket are the only counties showing a loss; the net gain, in percentages, in the other counties has been as follows: —

Suffolk,	43.25	Dukes,	13.55
Bristol,	35.14	Plymouth,	13.24
Hampden,	32.82	Franklin,	10.31
Essex,	21.75	Norfolk,	7.90
Worcester,	17.74	Berkshire,	6.49
Middlesex,	15.85	Hampshire,	6.41

The percentage of gain in Suffolk County has been abnormal from the annexation of Charlestown, Brighton, and West Roxbury, while in Middlesex and Norfolk the percentage has been correspondingly depressed by losses of territory and population.

The most striking instances of growth, independent of the influence of annexation, occur in the following places:

CITIES AND TOWNS.	1870.	1880.	Percentage of gain.
Fall River,	26,766	48,961	82 +
Montague,	2,224	4,875	119 +
Orange,	2,091	3,169	51 +
Holyoke,	10,733	21,915	104 +
West Springfield,	2,606	4,149	59 +
Everett,	2,220	4,159	87 +
Lowell,	40,928	59,475	45 +
Somerville,	14,685	24,933	69 +
Hyde Park,	4,136	7,088	71 +
Quincy,	7,442	10,570	42 +
Brockton,	8,007	13,608	69 +
Gardner,	3,333	4,988	49 +
Spencer,	3,952	7,466	88 +

The number of persons to the square mile is 221.78 against 181.26 in 1870, 153.12 in 1860, and 123.70 in 1850. The area of the State is put at 8,040 square miles in these averages instead of at 7,800 as in previous censuses. Massachusetts has no territory with less than 18 persons to the square mile; she has 300 square miles with from 18 to 45 to the square mile, 4,840 with from 45 to 90 to the square mile, and 2,900 square miles have over 90 persons to the square mile.

Families and Dwellings, pp. 27 to 36. The whole number of families in the State is 379,710, being 4.70 persons to each family; in

1870 this ratio was 4.77; in 1860, 4.90; and in 1850 it was 5.16. The whole number of families in 1870 was 305,534. The whole number of dwellings in 1880 was 281,088, being an average of 6.34 persons to a dwelling; the ratio in 1870 was 6.16; in 1860, 6; in 1850 it was 6.51.

This table gives the number of families and dwellings for each municipality, and the number of families, dwellings, and persons, to a square mile, persons to each family and dwelling, and acres to each person and family for the whole State, by counties.

The ratio of persons to families is, to a large extent, fictitious, for the family for census purposes includes asylums, hotels, etc., and as such institutions grow in number and size the census family is reduced in size.

The race composition of the population is shown, by towns, under PLACE OF BIRTH, NATIVE AND FOREIGN BORN, COLOR AND RACE, pp. 37 to 90. Of the whole population of the State, 1,783,085, the native born comprise 1,339,594, of which 1,088,565 were born in Massachusetts and 187,089 in the other States of New England. Maine has sent 68,226 of her people to dwell here, and New Hampshire 54,088; Vermont, Rhode Island, and Connecticut have sent 26,943, 17,258, and 20,574 respectively. New York has loaned us 35,628, while from all the other States and Territories we have received but 28,312.

While Massachusetts takes 251,029 from other States, she has contributed 267,730 persons born within her borders; these native born Massachusetts people are distributed as follows: —

STATES.

Alabama,	368	Maryland,	1,337
Arkansas,	374	Michigan,	9,591
California,	19,145	Minnesota,	7,223
Colorado,	3,638	Mississippi,	195
Connecticut,	22,643	Missouri,	4,765
Delaware,	264	Nebraska,	3,524
Florida,	852	Nevada,	1,037
Georgia,	625	New Hampshire,	20,561
Illinois,	20,481	New Jersey,	6,583
Indiana,	3,195	New York,	42,501
Iowa,	9,378	North Carolina,	336
Kansas,	5,395	Ohio,	10,854
Kentucky,	797	Oregon,	1,291
Louisiana,	641	Pennsylvania,	10,010
Maine,	10,066	Rhode Island,	23,320

South Carolina,	350	Virginia,	878
Tennessee,	519	West Virginia,	450
Texas,	1,568	Wisconsin,	8,274
Vermont,	8,295		

TERRITORIES.

Arizona,	564	New Mexico,	237
Dakota,	1,292	Utah,	645
District of Columbia,	1,693	Washington,	805
Idaho,	251	Wyoming,	396
Montana,	523		

The foreign born number 443,491, or 24.87 per cent of the total population. In 1875 the percentage was 25.36, and in 1870 it was 24.24, showing an increase of $\frac{63}{100}$ of one per cent since 1870 and a slight falling off since 1875. Of the total foreign born 226,700 or 51+ per cent were born in Ireland; in 1870 the Irish born were 61+ per cent of the whole foreign born. The Canadians are now 16 per cent, while in 1870 they were but 10.9 per cent of the whole foreign born; these two nationalities are thus gradually exchanging their individual ratios to the foreign born population of Massachusetts, the Irish having lost about 10 per cent, and the Canadians having gained about 6 per cent in the ten years from 1870 to 1880.

The English constitute but 10+ per cent, and the Germans but $\frac{3}{10}$ of one per cent of the foreign born.

The nationalities of the foreign born are given under general classification in the tables, but in order to have at hand a minute classification we have prepared the following table of the birthplaces of our foreign born: —

Total,	443,491		
Africa,	124	British America, not specified,	173
Asia,	54	Central America,	27
Atlantic Islands,	2,421	China,	314
Australia,	107	Cuba,	158
Austria (proper),	308	Denmark,	576
Belgium,	219	Europe, not specified,	93
Bohemia,	279	France,	2,212
Canada,	71,504	Baden,	1,588
New Brunswick,	12,006	Bavaria,	1,291
Newfoundland,	2,699	Brunswick,	136
Nova Scotia,	29,307	Hamburg,	118
Prince Edward Island,	3,613		

Hanover,	415	Hungary,	82
Hesse,	441	India,	231
Lübeck,	2	Italy,	2,116
Mechlenburg,	64	Japan,	27
Nassau,	90	Luxemburg,	13
Oldenburg,	15	Malta,	17
Prussia, not specified,	3,581	Mexico,	21
Saxony,	1,550	Norway,	639
Weimar,	15	Pacific Islands,	68
Würtemburg,	1,018	Poland,	681
Germany, not specified,	6,548	Portugal,	1,161
Gibraltar,	24	Russia,	462
England,	47,263	Sandwich Islands,	99
Ireland,	226,700	South America,	220
Scotland,	12,507	Spain,	211
Wales,	873	Sweden,	4,756
Great Britain, not specified,	89	Switzerland,	604
Greece,	41	Turkey,	102
Greenland,	3	West Indies,	676
Holland,	586	At Sea,	153

Closely allied to this table on Place of Birth, etc., are the two succeeding it, — PARENT NATIVITY, pp. 91 to 100, and FOREIGN PARENT NATIVITY, pp. 101 to 212, both by towns, by which the complete composition of the population of the State, as regards these points, is shown for the first time.

In 1880 the number of persons having both parents foreign born was 798,652, or 44+ per cent of the whole population, and those having one or both parents foreign born was 882,832, or 49.5+ per cent of the whole. In 1870 these percentages were 40.5 and 43— respectively.

AGES, pp. 213 to 256, are given by towns for each year up to 60, and then by quinquennial periods. Massing upon the fives is apparent in this census, as in all others where ages have been shown by years; for instance, there would seem to be no very good reason why there should be 37,120 people 35 years of age and only 22,897 and 23,631 of 34 and 36 years of age, respectively. This feature can be explained only on the grounds of ignorance of real age and the ease with which reckoning by fives is carried on. The recapitulation for the State, pp. 252 to 255, shows the ages for males and females and for native white, foreign white, and colored, distinguished also by sex, and for each year up to 110, there being one person of that age in the State, and 27 in all over 100 years of age.

There are 502,648 males of 21 years of age and over, divided as follows: Native white, 326,002; foreign white, 170,690; colored, 5,956. By counties, the males of voting age are thus distributed:

COUNTIES.	Native White.	Foreign White.	Colored.	Total.
Barnstable,	8,445	985	127	9,557
Berkshire,	12,412	5,744	357	18,513
Bristol,	23,190	14,050	599	37,839
Dukes,	1,252	72	102	1,426
Essex,	47,872	21,271	410	69,553
Franklin,	8,783	2,526	21	11,330
Hampden,	17,382	10,071	304	27,757
Hampshire,	9,284	3,594	96	12,974
Middlesex,	55,183	31,962	782	87,927
Nantucket,	1,024	80	16	1,120
Norfolk,	18,748	8,529	216	27,493
Plymouth,	19,011	3,584	158	22,753
Suffolk,	61,328	46,566	2,352	110,246
Worcester,	42,088	21,656	416	64,160
Totals,	326,002	170,690	5,956	502,648

The federal census did not take into account the question of naturalization, but on the basis of the State Census of 1875, of the foreign born males of voting age at that time, 46+ per cent were legal voters; probably 50 per cent or more of the 170,690 foreign born males of voting age in 1880 were legal voters. This would make the real voting population of the State to consist of native voters, 326,002; foreign voters, 85,345; colored voters, 5,956; total, 417,303.

The Occupations of the people are shown in eight presentations, pp. 257 to 458. These tables are so full and complete that no necessity exists for their analysis, especially as all points concerning which doubts might arise are explained by notes. These presentations have never been equalled in any census. The material was so rich, and so perfectly in the line of the statistics expected of this Bureau that I did not hesitate to enlarge this supplement to such proportions as should allow of the most satisfactory showings possible from the data. Under Classified Occupations, pp. 257 to 280, are given the grand divisions, by towns, classified as government and professional, domestic and personal office, trade and transportation, agriculture, fisheries, manufactures, etc.

In the purely productive occupations, manufactures, agriculture, fisheries, and laborers generally, there are 494,654 persons engaged, or 27+ per cent of the whole population. These producers are divided as follows: engaged in agriculture, 68,813; in the fisheries, 6,375; in manufactures and mechanical industries, 344,889; as apprentices, laborers, etc., 74,577. See p. 279 for details by counties and sex.

The second presentation is entitled OCCUPATIONS: MANUFACTURING AND MECHANICAL, BY INDUSTRIES, pp. 281 to 338. This gives the number of persons engaged in the several industries and the towns only in which such industries are respectively carried on, with distinctions as to sex. A State recapitulation will be found on p. 337.

Under PRINCIPAL OCCUPATIONS, with SEX AND NATIVITIES, by towns, pp. 339 to 374, is shown the number of persons engaged in the leading occupations in each town, distinguished by the birthplace of those so engaged, while the next table, pp. 375 to 394, gives the sex and age of persons so engaged, the age periods being from 10 to 15, 16 to 59, and 60 and over.

The two tables, PERSONS ENGAGED IN AGRICULTURE, first by towns, with sex and nativities, and second, by towns as to sex and ages, pp. 395 to 418, give data corresponding to the details shown for persons engaged in manufactures.

Two exhibits, OCCUPATIONS BY NAME, with sex, nativities and ages, for the State, pp. 419 to 458, complete the divisions under the general title, OCCUPATIONS. These two tables are too elaborate to have warranted the Bureau in extending their features to towns and cities, but the facts shown by them can be given for any town or city on application.

In the various showings of occupations the classification adopted in 1875 by this office has been applied, and the result is a slight variance (explained on page 458) from the results stated by the Census Bureau at Washington.

A casual examination discloses the fact that women have entered nearly every calling in which men are engaged. In government and professional employ there are 33,219 persons of both sexes; of this number 11,330 are females. Of course the larger proportion in domestic and personal service is made up of women. In trade and transportation 6,634 out of 118,385 are women, and in manufactures and mechanical industries 97,122 of 344,686 are women. In

nearly every sub-division of the great departments of employment it will be found, as stated, that women are competing with men.

Illiteracy, pp. 459 to 498, shows the facts, so far as the federal census took account, for each town and city. The census of 1880 did not give the number neither able to read nor write, but states the number of those who cannot write, classified as to age and nativity, and those who cannot read simply for those over ten years of age. This may have been so determined because those who cannot write are usually largely in excess of those who cannot read. It is to be regretted that no statement is made as to the number who can neither read nor write. The number ten years of age and over not able to read is 75,646, or 5.3 per cent of all over that age; the number unable to write is 93,065, or 6.5 per cent of all ten years of age and over. In 1870, the number of persons ten and over unable to read was 74,935, and unable to write 97,742. The number of native white persons in 1880 ten and over unable to write is 6,934, or seven-tenths of one per cent of all of such age; the number of foreign born white persons ten and over unable to write is 83,797, or 19.6 per cent of the whole population of such age. The colored population ten and over unable to write is 2,334, or 15.1 per cent of the whole colored population of such age. Of the native white persons ten and over unable to write 68 per cent are twenty-one and over, and of the foreign white 92 per cent are twenty-one and over.

Agriculture, pp. 499 to 516. The following instructions were given enumerators in the tenth census: —

"Farms," for the purpose of the agricultural schedule, include all considerable nurseries, orchards and market-gardens which are owned by separate parties, which are cultivated for pecuniary profit, and employ as much as the labor of one able-bodied workman during the year. Mere cabbage and potato patches, family vegetable gardens, and ornamental lawns, not constituting a portion of a farm for general agricultural purposes, will be excluded. No farm will be reported of less than three acres, unless five hundred dollars' worth of produce has been actually sold off from it during the year. The latter proviso will allow the inclusion of many market-gardens in the neighborhood of large cities, where, although the area is small, a high state of cultivation is maintained and considerable value produced.

A farm is what is owned or leased by one man and cultivated under his care. A distant wood-lot, or sheep-pasture, even if in another sub-division or district, is to be treated as a part of the farm; but wherever there is a resident overseer, or a manager, there a farm is to be reported.

Under these definitions the enumerators returned 38,406 farms, classified as follows: —

Under 3 acres,	85
3 and under 10,	2,366
10 and under 20,	3,865
20 and under 50,	9,632
50 and under 100,	10 587
100 and under 500,	11.588
500 and under 1,000,	243
1,000 acres and over,	40

The number of farms returned by the State Census of 1875 was 44,549, or 6,143 more than by the federal census of 1880; but the State Census did not make the distinctions contained in the quoted instructions to the enumerators for 1880, but "considered a farm as the home of a farmer, his workshop and his means of obtaining a subsistence; this necessitates certain appliances to enable him to carry on successfully the work of the farm; these necessary adjuncts comprise arable soil for crop land; pasture land for stock; woodland for material for fuel, fencing, etc., and all the buildings requisite for housing family, products and animals." Where these features existed the farm existed, whether there was employed as much as the labor of one man during the year or not, or whether, if under 3 acres, five hundred dollars' worth of produce was sold off during the year or not. In 1875 the 44,549 farms returned were classified, as to size, as follows: —

Under 3 acres,	724
3 to 10 acres, inclusive,	3,590
Above 10 to 20,	6,196
Above 20 to 50,	11,633
Above 50 to 100,	12,219
Above 100 to 500,	10,054
Above 500 to 1,000	122
Above 1,000 acres,	11

The chief difference between the number of farms shown at the different censuses named comes upon farms under 50 acres.

The statistics of farms, as were all statistics of the State Census of 1875, were taken by enumerators, who were paid by the day; under the federal census at so much per farm, the price being $12\frac{1}{2}$ cents or 15 cents, according to location. Agricultural statistics cannot be gathered successfully under the federal method, for it often

requires several hours to take the account of the products of a single farm.

The estimated value of all agricultural products was returned in 1880 at $24,158,881, but this amount was not arrived at by obtaining the value of each product, but by a general estimated statement as to the value of all products. Of course the result is unsatisfactory, for without doubt the products of the farms of Massachusetts for the year ending May 31, 1880, amounted to nearly twice the sum stated. The agricultural statistics of the Tenth Census while collected with more care and thoroughness than under any previous Federal Census cannot be given the very high statistical value, perfection, and completeness which belong to the social statistics of that census, or to the statistics of manufactures, yet the main difference between them and our own for 1875 belongs to differences in classification and methods of enumeration, and these remarks are made that the people of this State may understand clearly and not criticise unjustly. It should be remembered that the classification of the Federal Census must be made to conform to the whole United States, with all the vast interests of great farming States considered, while in our own State Census a more minute classification can be adopted, and one in harmony with the comparatively limited proportions of our agricultural industry. It must be that the census of 1880 secured returns from the most valuable farms, for their total value is stated at $146,197,415, while, in 1875, at the high valuation of that period, and with gold at 1.12, the total value was only $182,663,140. The average value of the farm in 1875 was $4,100; in 1880 it was $3,806.

Of the 38,406 farms returned under the last census, 35,266 are carried on by the owners, 2,292 by lessees for a fixed money rental; and 848 by lessees for a share of the products.

The Fisheries. By Customs Districts, pp. 517 to 532. The statistics of the fisheries of the State are more complete than those of any preceding census, State or federal. The aggregate value of the products of this branch of our industries is $8,141,750 for 1880, as compared with $6,215,325 in 1870, and $7,684,716 in 1875. There are several industries in this State closely related to that of the fisheries, the statistics of which are not included in the tables. Quite an important industry is that of the manufacture of isinglass from dried fish sounds and of liquid glue from fish skins. There are eight establishments engaged in the production of these goods,

employing 182 men, which produced during the census year $450,000 worth of products. Another industry largely dependent on the fisheries is that of the manufacture of commercial fertilizers. The value of fish entering into their production, in a prepared state, is $198,333.

Manufactures. By Towns, pp. 533 to 598. The industries of each city and town in the State are enumerated in this table, the number of establishments and of employés, the total wages paid for the year, the capital invested, the value of stock used and the value of product for each industry being given; when there were but one or two establishments of a particular industry in a place, the wages and the value of stock used have not been given; these omissions have been made that private business may not be exposed. In the occupations showing on p. 279 the number of persons engaged in manufactures and mechanical industries is given as 344,889. On p. 690 it will be seen that the manufacturers of the State report their average number of employés as aggregating 352,516, being an excess of 7,627. This variation is easily explained. The same employés may work for more than one firm in the course of a year, and each employer would count him as one in his schedule, while on the family schedule from which the occupations are drawn, he would be counted but once. Again, the manufacturers' returns being averages would necessarily vary somewhat from an exact enumeration. It will also be noticed that in some cities and towns more are reported by manufacturers as being employed in a certain industry than the occupation returns indicate, and in some places less are so reported. This is explained when it is borne in mind that the employés do not always *work* in the city or town in which they *live*. For instance, ten boot and shoe makers might appear in the occupation returns of a town, and yet there might be no boot and shoe factory in that town, the operatives being employed in an adjoining town.

The recapitulation on p. 597 will not agree with the totals given under the next showing of manufactures by name, for the reasons stated in notes on pp. 535 and 691. The county of Nantucket is omitted in the tables of manufactures; for some unexplained reason the manufacturing establishments of the town of Nantucket were not accounted for in the census. At a late day we took steps to secure the industrial statistics of Nantucket by mail, and the result is as follows: —

TOWN OF NANTUCKET.

INDUSTRIES.	Number of Establishments.	AVERAGE NUMBER OF EMPLOYES.				WAGES.	Capital invested.	Stock used.	Value of Product.
		Total.	Males above 16.	Females above 15.	Youth and Children.	Total paid during the year.			
Building,	5	33	33	–	–	$16,569	$5,900	$41,444	$60,126
Carriages and wagons,	1	6	6	–	–	...	2,000	...	5,000
Clocks and watches,	1	1	1	–	–	...	1,000	...	1,000
Clothing,	2	88	5	83	–	...	2,400	...	13,000
Metals and metallic goods,	2	1	1	–	–	...	2,500	...	2,200
Photographs,	1	2	2	–	–	...	1,000	...	2,000
Printing and publishing,	2	7	7	–	–	...	4,600	...	4,000
Soap,	1	–	–	–	–	–	200	...	1,000
Totals,	15	138	55	83	–	$27,649	$19,600	$47,844	$88,326

This total, of course, should be added to that stated in the recapitulations referred to on pages 597 and 690.

In 1875 the manufacturing establishments in Nantucket were 69 in number, with 327 employés, 223 males and 104 females; capital invested, $106,200; wages paid, $146,774; stock used, $58,800; value of product, $173,983. We are informed that but one industry, the manufacture of straw goods, has been discontinued in the town since 1875, and we are confident that the figures given are under what a careful personal enumeration would have supplied.

The industrial importance of the counties is in the following order: Suffolk, Middlesex, Essex, Worcester, Bristol, Hampden, Norfolk, Plymouth, Berkshire, Hampshire, Franklin, Barnstable, Nantucket, Dukes.

MANUFACTURES. BY NAME, pp. 599 to 698, is a table of industries and the towns in which they are carried on. The consolidation for the State, p. 688, gives the manufactures of the State, by name, with all the facts as to number of establishments, average number of employés, total wages paid, capital invested, value of stock used and value of product, stated for each industry. The unreliable feature of this table is that of capital invested; it is only a comparative figure and does not really represent the actual capital essential for the prosecution of business. Practically it

might as well be left out of census schedules. It is only valuable in comparison with other years. By this table it is seen that the total number of establishments is 14,563. It must not be supposed that because the State Census of 1875 reported 22,228 establishments engaged in manufacturing and mechanical industries that there has been a falling off — there has not been; but in 1875 the industries were classified as Manufactures and Related Occupations, the latter term meaning "those industries where an added value is given an article by new processes or manipulations, with the use of little if any additional stock." This classification in 1875 brought a great many minor industries under the enumeration of that year, for which statistics were not demanded under the federal census of 1880.

The total value of all products in 1880 was $631,135,284. This shows steady and rapid progress in our industries. Since 1850, a generation, by United States censuses, the product has been as follows on a gold basis: —

1850, ...	$157,743,994
1860, ...	255,545,922
1870, ...	443,130,955
1880, ...	631,135,284

In 1870 gold was 1.25, or 25 per cent average premium for the census year ending May 31, and the products were reported at $553,912,568, currency.

The increase in the quantity of goods made has been, undoubtedly, much larger in proportion than the increase in value of product. The margin of profit has diminished in almost the same ratio that quantity, per dollar of product, has increased.

The manufacture of boots and shoes is the leading industry, the product reaching $105,118,299; cotton goods come next in rank at $68,566,182; then food preparations, $68,035,755; then woollen goods, $47,473,668; metals and metallic goods, $40,190,569; leather, $30,188,859; clothing, $27,253,582; mixed textiles, $21,601,038; machines and machinery, $20,894,545; paper, $18,358,361; furniture, $11,196,827; printing and publishing, $10,474,684. These twelve industries produce $469,352,369 worth of goods out of the total product of the State.

The totals given in this Abstract may vary in some instances, and in slight degree, from those published in census bulletins or volumes; but such variations are due to revisions either after the publication of bulletins or before that of final volumes and after tally sheets were furnished this office. No general results are affected, however, by these slight variations, and they are fully explained by notes wherever they occur.

A few errors, either of transcription or from falling out of type, should be mentioned specifically.

Brookline, p. 71. The number of persons born in Maine should be 303 instead of "03." A typographical error.

Dennis, p. 536. The building industry should give 2 employés, males.

Nahant, p. 504. In a few copies 134 farms are given Nahant which should be credited to Newbury. This error was discovered while the pages were passing through the press.

New Bedford, p. 284. Under the heading "Arms and Ammunition," as shot, cartridge and fuse makers, 102 males and 5 females employed as boot and shoe factory operatives appear. These should be added to the boot and shoe operatives, so that, as corrected, the items would read: Arms and Ammunition, 2 males; Boots and Shoes, 220 males, 5 females. This error was one of transcription and was not discovered in time for correction.

Mr. Charles F. Pidgin, chief clerk, and Mr. Horace G. Wadlin, have been as faithful in carrying out the details of the preparation of this volume as in all their past work for this office, and it is with gratitude I acknowledge their services with those of the various clerks employed on the tables.

CARROLL D. WRIGHT.

VILLAGES IN MASSACHUSETTS.

[The following *unincorporated* places were returned separately by the enumerators. The list is not by any means complete, as very many enumerators failed to separate such bodies of population. The names of places are the local terms for sections or districts in the respective towns and cities. The population of these places has, of course, been included in the towns in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.]

[* The decrease in population in 143 towns is shown to be 79,945. This loss is apparent rather than real, and is due principally to changes in boundaries, annexations, the setting off of new towns and the complete absorption of populous towns or cities in other towns or cities. For instance, Adams lost 6,499 by the formation of the town of North Adams. Amesbury gave 2,226 to Merrimac. Brighton with 4,967, Charlestown with 28,323 and West Roxbury with 8,653 were absorbed in Boston and are dropped in the recapitulations. Groton gave 1,722 to Ayer, and Abington 5,611 to Rockland. These few towns and cities represent 58,031 of the apparent decrease. Irrespective of the causes above mentioned the actual loss in population in the 143 Massachusetts towns between 1870 and 1880 probably did not exceed 14,000, or 4+ per cent of their population in 1870.]

FOREIGN PARENT NATIVITY.

FOREIGN PARENT NATIVITY.

In the following table the nativity of the father and mother of every person in the State, one or both of whose parents were foreign born, regardless of age, is given. It also includes all foreign born persons. The countries considered are the United States, (U. S.), which includes all the native born; Ireland, (Ire.); Germany, (Ger.); Great Britain, not including Ireland, (G. B.); Scandinavia, (Scan.), which includes Sweden and Norway; British America, (B. A.), which includes Canada, Nova Scotia, etc.; and Other Countries, (O. C.), which includes all foreign countries not previously mentioned.

Of our population having foreign born parents some were born in the United States and the remainder in foreign countries. The foreign nativity of both father and mother, and the nativity, whether native or foreign, of each person is shown in the table. For illustration: in the town of Barnstable, third line, we see that 8 persons had fathers born in the United States and mothers born in Great Britain. Of these 8, but 2 were born in foreign countries, 6 being born in this country. The number of persons in the town of Barnstable having Irish born fathers and mothers is 165; (see eighth line) of whom 71 were foreign born and 94 were natives.

If native fathers and mothers become parents while they are visiting or temporarily residing in foreign countries, their children are, as a matter of fact, foreign born. Of this class, (see first line of the table) in the town of Barnstable there are 2, and in the whole State, 2,101. They are in reality "native;" but are necessarily classified in this table among "foreign born." Forming less than one-half of one per cent of the foreign born, they will not affect any conclusions relative to the real foreign born, or those persons having one or both parents foreign. Thus (see State totals) we find that 443,491 persons in Massachusetts were foreign born. All but 2,101 of whom had one or both parents of foreign birth. In addition, 439,341 persons born in the United States had one or both parents of foreign birth. This gives 882,832 persons, less 2,101, or 880,731, as the number having one or both parents of foreign birth. The remainder of the State's population, 900,253, were born in the United States, as were both their parents. If we add the 2,101, we obtain 902,354 as the whole number having native parents. The State's population being 1,783,085, the pure natives (*i. e.* native born with native parents) are found to form 50·48 + per cent, while the wholly or half foreign (*i. e.* either native or foreign born with one or both parents foreign born) form 49 51 + per cent.

AGES.

AGES.

The number of persons of each age, in each town and city, from "under 1" to "60," and by quinquennial periods for those over 60 years of age, is given in the following table. We also give a State Recapitulation which presents each year, together with the details of sex, native, foreign and colored. A similar complete showing for each town, city or ward can be snpplied by this office. The necessity of economizing in space prevented the printing of these details for towns, cities and wards.

Females,	2,492	21,114	3,373	21	–	13,673	395	41,068
County of Worcester,	3,196	6,619	8,750	12,412	2	50,846	8,076	89,901
Males,	1,761	1,422	8,371	12,365	2	37,782	8,030	69,733
Females,	1,435	5,197	379	47	–	13,064	46	20,168

Note. — In the following table we supply the means for comparison between the occupation returns from the Massachusetts State Census of 1875, and the United States Census of 1880:—

Classification.	1875.	1880.
Government and professional,	29,730	33,568
Domestic and personal office,	96,701	75,405
Housewives,*	328,188	–
Trade and transportation,	104,935	117,641
Agriculture,	74,500	68,813
Fisheries,	6,656	6,375
Manufactures and mechanical industries,	316,459	344,889
Apprentices, laborers and indefinite,	65,430	74,577
Occupation not given,	347,129	1,061,817
Scholars and students,*	282,784	–
Totals,	1,651,912	1,783,085

* Not given by United States Census.

OCCUPATIONS:

MANUFACTURING AND MECHANICAL.

BY INDUSTRIES.

OCCUPATIONS.

MANUFACTURING AND MECHANICAL INDUSTRIES.

[The following Tables give the number of persons, with sex, residing in the towns and cities specified, who are engaged in the respective manufacturing and mechanical industries. These persons may or may not work in the towns in which they reside. The occupations named in detail at the head of each industry are the ones included or covered by the general heading under which they appear.]

AGRICULTURAL IMPLEMENTS.

[Agricultural implement makers.]

PRINCIPAL OCCUPATIONS.

BY TOWNS.

WITH SEX AND NATIVITIES.

PRINCIPAL OCCUPATIONS BY TOWNS.

WITH SEX AND NATIVITIES.

"Principal Occupations" are given in the following table for 165 of the 347 towns and cities in the State in 1880. These principal occupations all belong to manufactures and mechanical industries. By comparison with the Manufactures and Mechanical Industries column in "Classified Occupations," page 259, the proportion of the principal occupations to all engaged in manufactures and mechanical occupations can be seen; the proportion ranges from two-thirds to three-quarters of all employed in manufactures and mechanical industries in each city or town.

PRINCIPAL OCCUPATIONS.

BY TOWNS.

WITH SEX AND AGES.

PRINCIPAL OCCUPATIONS BY TOWNS.

WITH SEX AND AGES.

[See Note on page 341. Owing to the width of the page the persons between the ages of 10 and 15, engaged in the following occupations, are not specified in this table by sexes. The number of each sex, of these ages, may be readily obtained, however, by deducting the sum of the totals of each sex between 16 and 59 and 60 and over, as given in the table, from the aggregate number of each sex.]

PERSONS ENGAGED IN AGRICULTURE.

WITH SEX AND AGES: BY TOWNS.

[Owing to the width of the page the persons between the ages of 10 and 15, engaged in agriculture, are not specified in this table by sexes. The number of each sex, of these ages, may be readily obtained, however, by deducting the sum of the totals of each sex between 16 and 59 and 60 and over, as given in the table, from the aggregate number of each sex.]

OCCUPATIONS BY NAME.

FOR THE STATE.

WITH SEX AND NATIVITIES.

OCCUPATIONS BY NAME.

FOR THE STATE.

WITH SEX AND NATIVITIES.

In the following table, under the class headings shown in "Classified Occupations," the occupations by name of all the people in the State are given, with details of sex and nativities. The necessity of economizing in space prevented the giving of a similar detailed showing for each town and city, but the data are in the possession of this office and can be supplied to those needing the information for statistical purposes.

Totals, — The State,	721,268	720,774	+494

The United States Census will not present the occupations of the people by such minor civil divisions as cities and towns, except for a few large cities. The State totals of Occupations as arrived at by the United States Census authorities are given on pages 419 to 458 under the title "Occupations by Name, for the State." The State totals, as given in "Classified Occupations," pages 257 to 279, were arrived at by the Bureau from special tally sheets supplied by the Census Office, as will be seen by the above comparative table. The special tally sheets, as revised for the Bureau, contained 494 more than the original Census Office State total sheet. To have distributed these 494 by nativities and ages was impossible, as the Bureau could not have done so without constant reference to the original schedules in the Census Office. The variations between the Bureau and Census Office aggregates as regards the various classes (government and professional, etc.), as shown above, are owing to differences in classification, the Bureau in all cases conforming its classification to that adopted in the State Census of 1875, so as to make the figures more thoroughly comparable. Under the class heading "Trade and Transportation," the Bureau classified 744 less than the Census Office did, and under "Apprentices, Laborers, and Indefinite," 652 less; but these 1,396, and the 494 additional, or 1,890, all find places under the Bureau classification in the other classes. The Bureau "Classified Occupations" table contains the greater number of occupations, and is the "total" table, but for the distribution of occupations as regards nativities and ages, the Census Office "Occupations by Name" table must be relied upon.

ILLITERACY.

ILLITERACY.

The United States Census of 1880 divided the illiterates into two classes; those ten years of age and over who could not *write*, and those ten years of age and over who could not *read*. The table following is so arranged as to show for each town, city, and county, the total population, with sex; the population ten years of age and over with distinctions as regards native, foreign born, colored, and sex; the number of illiterates who cannot *write*, with distinctions as regards native, foreign born, colored, ages, and sex, thus supplying the information necessary for minute comparisons. The Census authorities did not furnish similar detailed information concerning those illiterates who cannot *read*. In addition to the usual county and State recapitulations we present two State showings which supply the percentage of illiteracy, and the ages of the illiterate.

AGRICULTURE.

AGRICULTURE.

The following information, supplied by the United States Census Office, should be borne in mind in the consideration of the statistics of agriculture: —

Number of Farms. — Farms include all considerable nurseries, orchards, and market gardens which are owned by separate parties, which are cultivated for pecuniary profit, and employ as much as the labor of one able-bodied workman during the year. No farm is reported of less than three acres unless five hundred dollars worth of produce was actually sold off from it during the census year. This provision allowed the including of market gardens in the neighborhood of large cities.

Hay — Tons mowed in 1879.

Milk. — Number of gallons of milk sold, or sent to butter and cheese factories from farms, in 1879.

Butter. — Pounds of butter made on farms. Factory products not included.

Cheese. — Pounds of cheese made on farms. Factory products not included.

Eggs. — Dozens produced in 1879.

Tobacco. — Acres under cultivation and pounds produced in 1879.

Irish Potatoes. — Acres under cultivation and bushels raised in 1879.

Indian Corn. — Acres planted and bushels (shelled) harvested in 1879. In Nantucket County storm and drought caused a partial failure of crop.

Value of Products. — Estimated value of all farm productions (sold, consumed, or on hand), for 1879.

Persons engaged in Agriculture. — See Tables given previously, — pages 398 and 413.

THE FISHERIES.

BY CUSTOMS DISTRICTS.

THE FISHERIES.

From the report of the special agent of the United States Census in charge of the Fishery investigation we obtain the following valuable information, which is necessary for the proper understanding of the tables presented.

The tables show the persons employed, the quantity of apparatus, the capital invested, and the quantity and value of the products of the fisheries in each of the eleven customs districts of the State. The cities and towns included in these fishery districts are as follows:

Newburyport District. — Newburyport and Ipswich.

Gloucester District. — Gloucester, Essex, Rockport, and Manchester.

Salem District. — Salem and Beverly.

Marblehead District. — Marblehead, Swampscott, Lynn, and Nahant.

Boston District. — Boston, Medford, and towns south to Cohasset.

Plymouth District. — Scituate, Duxbury, Kingston, and Plymouth.

Barnstable District. — Cape Cod towns, Sandwich to Provincetown and Wood's Holl.

Nantucket District. — Nantucket and adjacent islands.

Edgartown District. — Martha's Vineyard, No Man's Land, and Elizabeth Isles.

New Bedford District. — New Bedford, and towns from Wareham to Westport Point.

Fall River District. — Fall River, the Taunton and adjacent rivers, and the shad fishery at Holyoke.

Each district is credited with the production of its own fishing fleet, regardless of the fact that many of the products may be landed and sold outside the district or State. The production of the fisheries is for the year 1879. The district of Gloucester produces more than half the entire yield of the State.

The amount of ice used during 1879 for the preservation of fish is estimated at 75,000,000 pounds, and the quantity of salt used in curing fish was about 70,000,000 pounds.

The reference figures given in the table refer to the "Notes on The Fisheries" on page 531.

NOTES ON "THE FISHERIES."

[Explanation of reference figures in preceding table.]

[1] 8,279 in food-fish fishery, 3,991 in whale fishery, 30 in seal fishery, 10 in lobster fishery, 266 in menhaden fishery, 31 in squid fishery, 30 in oyster fishery. Some of those in the food-fish fishery are employed for a part of the year in the lobster or the oyster fishery.

[2] Forty-seven additional fishing vessels, measuring 2,151.68 tons, were idle throughout the year 1879.

[3] Includes two purse-seines in shore fisheries.

[4] Exclusive of boats and nets.

[5] Includes $800, value of purse-seines in shore fisheries.

[6] It is estimated that 39,855,000 pounds of mackerel and other fish were caught and thrown away as useless, the mackerel being too small for sale in fresh or pickled state. In 1880 and 1881 several million pounds of such mackerel were canned, and found a ready sale.

[7] Includes 53,636 pounds taken in the Connecticut River in Massachusetts.

[8] Includes species not elsewhere enumerated, or that could not be classified, also some fish used for bait and fertilizing purposes.

[9] 1,774,995 pounds used for bait; 937,139 pounds used for food.

[10] 2,610,514 pounds used for bait; 1,216,610 pounds used for food.

[11] 25,811,573 pounds used by menhaden oil factories; 254,504 pounds used for bait. The menhaden caught by New Bedford vessels were sold to oil factories in other States and are credited to this district at their value to the fishermen. Their enhanced value as oil and scrap is credited to the States where the factories are located.

[12] 53,636 pounds of these were taken in the Connecticut River in Massachusetts.

[13] This is the weight of the dried fish when whole; 5,000,000 pounds may be deducted as the reduction in weight of about 23,000,000 pounds prepared as boneless.

[14] Includes $104,000 enhancement on "boneless fish" accounted for elsewhere.

[15] Includes about 600,000 pounds of salt mackerel put up in tin cans at Gloucester and Boston.

[16] Includes $58,300, as follows: 264,000 cans fishballs, $38,500; 38,400 cans smelts, $4,800; 36,000 cans fish chowder, $7,500; and 36,000 cans clam chowder, $7,500, packed in Boston. In addition to the foregoing, 463,152 cans lobsters, valued at $57,894, and 403,200 cans fresh mackerel, valued at $33,600, were put up outside the State in factories owned by Boston firms.

[17] 31,832 bushels of these, valued at $12,305, are sold for bait in the fisheries.

[18] Enhancement on oysters from Southern States.

[19] Includes menhaden scrap, halibut head chum, refuse of "boneless fish," etc. Four fertilizer manufactories in the State, employing several hundred men and a large capital, make use of fish, already accounted for, in the preparation of their product.

[20] Eight isinglass and fish-glue factories in Massachusetts, employing 182 men and a capital of $315,000, produced $450,000 worth of ribbon isinglass and glue in 1879.

[21] Includes walrus and blackfish oils.

[22] Cheap grade of bone, principally from finback whales.

[23] Includes $101,400 enhancement in refining.

[24] Includes $25,000 enhancement in refining.

[25] 39,855,000 additional pounds of fish taken, but not utilized.

[26] About 60 per cent of this enhancement may be credited to the vessel industry and 40 per cent to the shore industry.

[27] Includes $58,300, as follows: 264,000 cans fishballs, $38,500; 38,400 cans smelts, $4,800; 36,000 cans fish chowder, $7,500; 36,000 cans clam chowder, $7,500.

[28] Enhancement on fish prepared as "boneless" in Boston, but accounted for elsewhere.

[29] $2,375 enhancement on southern oysters.

[30] $26,000 enhancement on southern oysters.

[31] $325,625 enhancement on southern oysters.

[32] $9,750 enhancement on southern oysters.

MANUFACTURES.

BY TOWNS.

MANUFACTURES BY TOWNS.

In order that the business of individual establishments may not be disclosed to the public, the items of "wages paid" and "stock used" are omitted in all cases where there are not at least *three* establishments engaged in a particular industry in a city or town. The items of wages and stock used are also omitted in case the number of establishments engaged in *all* industries in a city, town, or county is less than *three*. In all cases items omitted, as regards industries or cities and towns, appear in the county totals, and the grand totals of wages paid and stock used are given in the State aggregates.

Such omissions are indicated, in all cases, by the use of leaders (. . .); in cases where the figures were not given in the original returns, the dash (–) is used to denote the deficiency. The items of wages paid and stock used were generally returned by the United States Census enumerators and special agents, and the distinction above is made to remove a possible impression that the United States Census was deficient in these respects. The omissions are made only for reasons given above.

The statistics of manufactures given under the headings "Manufactures by Towns" and "Manufactures by Name" do not include the returns for Breweries and Distilleries; Coke; Gas; Glass; Mixed Textiles; Petroleum refining; Print Works, Bleacheries, and Dye Works; Salt; Shipbuilding; and Silk and Silk Goods. These industries were assigned to special agents, and the Census Office was unable to supply the Bureau with details by towns. The exact or estimated State totals of these omitted industries will be found in the Recapitulation of "Manufactures by Name." The branches of manufacture included under the condensed class headings (such as "Metals and Metallic Goods,") will be found given in detail at the head of each industry presentation under "Manufactures by Name."

MANUFACTURES.

BY NAME.

MANUFACTURES BY NAME.

In order that the business of individual establishments may not be disclosed to the public, the items of "wages paid" and "stock used" are omitted in all cases where there are not at least *three* establishments engaged in a particular industry in a city or town. The items of wages and stock used are also omitted in case the number of establishments engaged in *all* industries in a city, town, or county is less than *three*. In all but a few cases items omitted, as regards industries or cities and towns, appear in the county totals; the grand totals of wages paid and stock used are always given in the State aggregates.

Such omissions are indicated, in all cases, by the use of leaders (. . .); in cases where the figures were not given in the original returns, the dash (-) is used to denote the deficiency. The items of wages paid and stock used were generally returned by the United States Census enumerators and special agents, and the distinction above is made to remove a possible impression that the United States Census was deficient in these respects. The omissions are made only for reasons given above.

The statistics of manufactures given under the heading "Manufactures by Name" do not include the returns for Breweries and Distilleries; Coke; Gas; Glass; Mixed Textiles; Petroleum refining; Print Works, Bleacheries, and Dye Works; Salt; Shipbuilding; and Silk and Silk Goods. These industries were assigned to special agents, and the Census Office was unable to supply the Bureau with details by towns. The exact or estimated State totals of these omitted industries will be found in the "Recapitulation of Aggregates." The branches of manufacture included under the condensed class headings will be found given in detail at the head of each industry presentation. The classification adopted is that of the State Census of 1875 with some slight changes.

MANUFACTURES BY NAME.

AGRICULTURAL IMPLEMENTS.

[Apple parers, apple pickers, cradles, cultivators, dibbles, feed cutters, garden rakes, harrows, hay cutters, horse rakes, horse hoes, hoes, hay tedders, hones, rifles and whetstones, mowing machines, mowing and reaping machine knives, mowing and reaping machine attachments, mowing and reaping machine sections, pruning knives, plows, potato diggers, rakes, reaping machines, scythes, scythe snaths, seed sowers, stump pullers, shovels, spades, tree protectors, winnowing machines, yokes, etc.]

DYEING AND FINISHING TEXTILES.

[See note on page 601. The State aggregates given below represent the dyeing and finishing establishments engaged in dyeing and finishing textiles made in the textile factories, and often forming part of same. Under the heading "Printing, Dyeing, and Bleaching," the smaller dyeing, bleaching, and finishing establishments are grouped, the majority doing work principally for individuals.]

NOTE, EXPLANATORY OF THE TABLES OF MANUFACTURES.

We present hereinafter two recapitulations of manufactures drawn from the compendium of the Tenth Census of the United States. In the preceding showings "Manufactures by Towns," page 597; "Manufactures by Name," page 687; and in the "United States Census aggregates," below, three different sets of aggregates are arrived at, as follows:—

Classification.	A. By Towns.	B. By Name.	C. U. S. Census.
Number of establishments,	14,134	14,560	14,352
Average number of employés,	335,078	352,516	352,255
Males above 16,	217,603	228,924	228,834
Females above 15,	101,241	106,229	105,976
Youth and children,	16,234	17,363	17,445
Wages; total paid during the year,	$121,103,705	$127,851,263	$128,315,362
Capital invested,	280,175,753	303,534,241	303,806,185
Stock used,	355,737,797	374,785,716	386,972,655
Value of product,	581,983,449	617,055,281	631,135,284

These variations are easily explained. Showing "A" includes all establishments for which details by towns were procured by us from the United States Census Office in February, 1882. Showing "B" includes in addition to the above the State aggregates drawn from the reports of the special agents, while showing "C," the grand total, includes all comprehended by showings A and B, and also all additions, changes, corrections, etc., made at the Census Office since February, 1882, and which it was impossible for us to include in the Bureau showings without an expenditure of time and money which this office could not afford. The statistics of manufactures supplied will, however, answer the general public demands, and in the case of local detailed information only, regarding a few industries, will they be found lacking in completeness.

The Bureau showing "B" classifies by name industries whose value of product reaches the sum of $617,055,281, leaving $14,080,003 unclassified. In the United States Census Office showing "C," but $595,877,323 are distributed under specific industry heads, leaving $35,257,961 unclassified. It will be seen that 60+ per cent of the amount not classified by the Census Office has, in the Bureau presentation, been credited specifically to the proper industries.
